Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 March 2006.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This action is in response to the application filed on March 28, 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 recites the limitation "the tubular region of an expandable and shrinkable article" in lines 2 and 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsugawa (US publication 2004/0089309) in view of Griffiths (US publication 2002/0139373).

In regards to claim 1, Tsugawa teaches the abstract, Figure 1, Figure 14, [0075], [0080] and [0086] a condom held and rolled on a ring (auxiliary device 82) while an

opening in a tubular region of the condom is expanded, the ring (auxiliary device 82) comprising a rigid ring and a rotor (the ring having a shape in the state as if a number of beads (rotors) are coupled), wherein the rigid ring (auxiliary device 82) is sheathed (by the condom) and the ring (auxiliary device 82) is removable after placement of the condom. Tsugawa does not teach that the ring comprises a lubricant layer. However, Griffiths teaches in [0027] an analogous device in which the ring (installation ring) comprises a lubricant layer. It would have been obvious to modify the ring taught by Tsugawa with the lubricant layer taught by Griffiths because this element is known to make the condom simpler to use, as Griffiths teaches in [0014]. The claim recitation "wherein the rigid ring is **sheathed via the lubricant layer with the rotor**" is being treated as a product-by-process recitation. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985) (citations omitted).

In regards to claim 2, Tsugawa and Griffiths teach the apparatus of claim 1. Tsugawa teaches in the abstract and Figure 1 that the ring (auxiliary device 82) is able to be used in rolling the tubular region of an expandable and shrinkable article (condom) thereon.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VICTORIA HICKS whose telephone number is (571)270-7033. The examiner can normally be reached on Monday through Thursday, 7:00am-5:30pm.
